

LeadForge — AI-Powered B2B Lead Generation

Upload your leads. Get hyper-personalised cold emails in minutes. One workspace for CSV import, AI drafting, and export — built for reps who outgrow templates.

leadforge · confidential overview

From CSV to send-ready copy

Three simple steps — no complex stack. Bring your list; LeadForge handles the rest.

1

Upload your CSV

Drop a file from Apollo, Sales Navigator, or any export. Map columns once (name, company, LinkedIn, email).

2

AI analyses context & writes emails

Our models read the signal you provide and produce short, natural cold emails — not generic mail-merge paragraphs.

3

Export ready-to-send emails

Download a CSV with your original fields plus the final draft column. Plug into Instantly, Lemlist, or your sequencer.

What you get

Built for outbound teams who want quality at scale — without another bloated sales tool.

Smart column mapper — match CSV headers to LeadForge fields in seconds.

Three depth levels of personalization — from light touch to richer context.

Full cold email generation — structured, peer-to-peer tone, low-friction CTAs.

One-click export to CSV — original data plus AI draft column.

Usage & quota tracking — stay inside your plan with clear limits in-app.

PRICING

Simple tiers (£ / month)

List pricing in British pounds. Annual billing is available on the site.

<p>Starter</p> <p>£550 / month</p> <p>per month · entry scale</p>	<p>MOST POPULAR</p> <p>Pro</p> <p>£1,250 / month</p> <p>per month · growing teams</p>	<p>Enterprise</p> <p>£2,500 / month</p> <p>per month · high volume</p>
